

THE MOUNTAINS RECREATION AND CONSERVATION AUTHORITY

PROPOSED EAST SANTA MONICA MOUNTAINS/HOLLYWOOD HILLS OPEN SPACE DISTRICT

The Mountains Recreation and Conservation Authority (MRCA) is a local park agency that is responsible for acquiring, maintaining and improving open space, parklands, and wildlife corridors within the East Santa Monica Mountains / Hollywood Hills Area of the Santa Monica Mountains Conservancy Zone from the 405 Freeway east to Griffith Park. Unlike most public agencies, the MRCA does not receive ongoing funding from state or local sources. Much of its operations, maintenance, and security budget has been funded by Los Angeles County's Proposition A, a 20-year-old property assessment that is about to expire. For \$24 per year, Measure HH will allow the MRCA to maintain and enhance the public safety, fire prevention, and open space services it currently provides in this local area.

MEASURE HH WOULD:

- Maintain and protect local open space, parklands and wildlife corridors and the Mulholland Drive scenic overlooks
- Improve local fire prevention services, including crews to clear dry brush and eliminate other fire hazards
- Maintain and improve park ranger safety and security patrols to prevent crime and vandalism
- Improve local water quality by keeping pollution and trash out of local creeks and reservoirs

Every penny raised by Measure HH will stay in the local area and cannot be used for other purposes. A Citizen's Oversight Committee will conduct annual audits to ensure the funds are spent properly and only in the East Santa Monica Mountains / Hollywood Hills Area.
